

State University of Utrecht, School of Veterinary Medicine

This report provides summary information on the scores of the senior students enrolled in your school who took the NAVLE® for the first time in November-December 2019 or April 2020, under standard testing conditions. Their mean scores and passing rates are compared to those of the criterion group. The criterion group includes all seniors enrolled in American Veterinary Medical Association (AVMA) accredited schools who took the examination for the first time in November-December 2019 or April 2020, under standard testing conditions.

The first page of the report includes two tables. The first table lists the counts, number passing, percent passing, mean scale score, and standard deviation for the total criterion group (no April repeaters) from all schools and your school. The second table lists the average percentage of correct item responses and standard deviations for the total test and each major content area. Score information is not included for species content areas that have too few items since the results are unreliable and prone to misinterpretation. Score breakdowns are also included for the twelve organ systems on the NAVLE. Please note that there are fewer than twenty items in some of these categories and that the items are not evenly distributed by organ system across the different species categories. Therefore, please use discretion in interpreting these results.

The final page of the report provides a summary of candidate performance for November-December 2019 and April 2020 criterion group candidates, November-December criterion group examinees who re-took the test in April, and all 2019-2020 criterion group candidates (based on most recent take). This page provides the counts, number passing, percent passing, mean score and standard deviation for all criterion group candidates and the criterion group candidates from your school.

The information in this report is designed to help schools evaluate the performance of their students on the NAVLE. Please let us know if you have any questions or comments on this report.

State University of Utrecht, School of Veterinary Medicine

These results are based on all criterion group candidates, first takes only

Summary

Criterion Group Candidates	N	Number Passing	Percent Passing	Mean Scale Score (SD)
All	4350	3819	88	498(65)
Your School	1	0	0	400(---)

Average Percentage of Items Correct and Standard Deviation (SD) by Content Category

	All	Your School
Total Test	70(8)	57(---)
Species		
Small Animal	71(9)	63(---)
Canine	72(9)	69(---)
Feline	72(10)	59(---)
Food Animal	67(10)	53(---)
Bovine	68(11)	54(---)
Porcine	67(15)	47(---)
Equine	69(11)	41(---)
Organ System		
Cardiovascular	71(16)	58(---)
Endocrine	77(17)	50(---)
Gastrointestinal	69(11)	52(---)
Hemic and Lymphatic	71(14)	60(---)
Integumentary	69(11)	68(---)
