

# Social Safety

## Roadmap

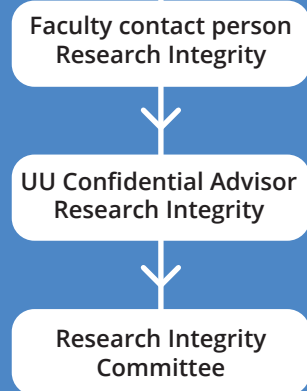

### Inappropriate Behaviour

E.g. (sexual) intimidation, aggression, violence, bullying, discrimination.

### Research Integrity

E.g. questions on possible manipulation of data, sources or incorrect presentation of results, but also about careless handling of data or not acting independently from political or commercial influences.

These flowcharts visualise the steps you can take in case of inappropriate behaviour or (suspected) violation of research integrity. It is usual to approach the contact persons on the top first, and thus go down the line if necessary. If you want to, you are free to skip a step.
