Picture of the Skyscraper by StudioKCA (Jason Klimoski and Lesley Chang)
A huge whale, made of five tons of plastic from the Pacific Ocean, jumps out of the Catharijnesingel in Utrecht, in front of TivoliVredenburg. The Skyscraper serves as a statement against the huge volumes of plastic waste polluting the world's rivers, seas and oceans. At the initiative of Utrecht University's Faculty of Law, Economics and Governance, the Skyscraper was brought to Utrecht and during the first half of 2020 events and lectures were organized to draw attention to this topic.
