Programme
Fifth Molecules and Medicine Symposium
Friday 22 January 2016
David de Wied building M2.01, Universiteitsweg 99, Utrecht

12.00 Registration and lunch
13.00 Prof. Roos Masereeuw, Pharmaceutical Sciences
   Kidney-on-a-chip technology for the prediction of renal drug handling
13.30 Prof. Niels Geijsen, Veterinary Medicine
   Regenerative medicine
14.00 Prof. Edwin Cuppen, UMCU
   Center for Personalized Cancer Treatment (CPCT) and Hartwig Medical Foundation: from whole genome sequencing data to knowledge to better care
14.30 Dr. Sabrina Santos Oliveira, Biology
   Nanobody-targeted photodynamic therapy for oncology
15.00 Tea/coffee
15.30 Dr. Nathaniel Martin, SynAmp
   New antibiotic strategies: targeting the lipid II pathway from start to finish
16.00 Dr. Nina van Sorge, UMCU
   Interplay between bacterial surface glycans and host immunity
16.30 Prof. Geert-Jan Boons, Chemistry/Pharm.Sci.
   Functional glycomics through chemical synthesis
17.00 Drinks
